

The figure displays a 5x10 grid of nodes, labeled Q0 through Q24 (blue) and F0 through F24 (orange). The nodes are arranged in a regular grid. The X-axis is labeled 'X Position' and ranges from 0 to 10. The Y-axis ranges from 0 to 5. Nodes are either known (with a θ value) or unknown (marked with '?').

Known nodes and their θ values:

- Q0, Q5, Q10, Q15, Q20: $\theta = 0.008$
- F0, F5, F10, F15, F20: $\theta = 0.016$
- Q1, Q6, Q11, Q16, Q21: $\theta = 0.002$
- F1, F6, F11, F16, F21: $\theta = 0.004$
- Q2, Q7, Q12, Q17, Q22: $\theta = 0.002$
- F2, F7, F12, F17, F22: $\theta = 0.004$
- Q3, Q8, Q13, Q18, Q23: $\theta = 0.008$
- F3, F8, F13, F18, F23: $\theta = 0.032$
- Q4, Q9, Q14, Q19, Q24: $\theta = 0.032$
- F4, F9, F14, F19, F24: $\theta = 0.008$

Unknown nodes (marked with '?') are: Q3, Q4, Q6, Q7, Q9, Q11, Q12, Q14, Q16, Q17, Q19, Q21, Q22, Q24, F3, F4, F6, F7, F9, F11, F12, F14, F16, F17, F19, F21, F22, F24.

Connections (arrows) are shown between nodes:

- Red arrows: Q3 to F3, Q3 to F4, Q3 to F18, Q3 to F19, Q3 to F23, Q3 to F24.
- Green arrows: Q16 to F16, Q16 to F17, Q16 to F18, Q16 to F19.
- Purple arrows: Q18 to F18, Q18 to F19, Q18 to F23, Q18 to F24.
